

## GET YOUR TUMOR TESTED ... FREE !!!!

A national study is taking place that offers advanced lung-cancer patients free screenings of their tumors for genetic mutations, some of which might be targets for treatment with existing or experimental therapies. There are 14 medical sites in the U.S. participating in the *Lung Cancer Mutation Consortium Protocol*, a federally funded study coordinated by researchers at the University of Colorado. Study participants will have their tumors tested at no cost to them and will have access to their results. In addition, medical professionals will guide participants to any current clinical trials of drugs that target specific mutations found in their tumors. Researchers at the 14 consortium sites also will compile a database so that as new therapies are developed, they can contact patients and link them to clinical trials investigating their specific tumor mutations.

### ***Lung Cancer Mutation Consortium Protocol Testing Sites***

<b>Site</b>	<b>Location</b>	<b>Coordinator</b>	<b>Phone</b>	<b>Email</b>
<b>Dana-Farber/Brigham and Women's Cancer Center</b>	Boston, MA	Elizabeth Doran	617-632-5431	<a href="mailto:elizabeth_doran@dfci.harvard.edu">elizabeth_doran@dfci.harvard.edu</a>
<b>Winship Cancer Institute at Emory University</b>	Atlanta, GA	Kim Kerstann PhD	404-778-1235	<a href="mailto:kfkerst@emory.edu">kfkerst@emory.edu</a>
