With this white ribbon of support and advocacy, you show your love and appreciation for those living with lung cancer, as well as your commitment to a meaningful cause. Your awareness ribbons can educate communities about lung cancer and raise money for impactful research.

What You Need:

- 6" strip ribbon of your choice - Using satin or grosgrain ribbon with a ½" or ⅝" width is recommended. Satin ribbon can add a beautiful shine to your design, and grosgrain ribbon is a more durable ribbon because of its ribbed design.
- Scissors
- Hot glue gun
- Small safety pin

Step-by-step instructions:

1. Using your scissors, cut a 6" strip of ribbon.
2. Take your ribbon by the ends and fold it to create a small loop so that both the ends are crossed at the front and facing down.
3. Using your hot glue gun, apply a small dot of glue where the two ribbon ends overlap. Wait for this to cool and dry before moving on to the next step.
4. When the glue has set, apply another small dot of glue on the back of the ribbon.
5. While the glue is still wet, take your safety pin and place the side with the safety head into the glue. Make sure that the pin side of the safety pin is facing outwards and not down as this will make attaching the pin to your shirt more difficult.
6. After the glue has set, your pin is now ready to use.

Directions to create your own ribbon pins to “share the awareness”
