

Hope With Answers Living With Lung Cancer

Episode 02 Podcast Show Notes

Title: What does it mean to be living with lung cancer?

Date: 2/27/20

Brief description: Shelly Engfer-Triebebach doesn't sit still: she's a very busy mom, a golfer, a music teacher, and an advocate for people living with lung cancer. Shelly is passionate and eloquent when talking to other patients about the importance of advocating for better treatments, more options, and even more optimism. She was diagnosed in 2013 and we'll talk to her about what that means to live with lung cancer day-to-day. We'll also talk to Young Investigator and lung cancer researcher Dr. Alice Berger about how research is changing the landscape of lung cancer diagnosis and treatment, almost day-by-day. We'll also check in with LCFA board member and 14-year lung cancer survivor about why research funding is so incredibly important to changing the outcomes for patients now, and in the future.

A Block Guest: Shelly Engfer-Triebebach

- Starts at: 00:00

C Block: A word from LCFA board member [Dr. Michael Weitz](#)

- Starting timecode: 21:05

LCFA's mission is the improvement in survivorship of lung cancer patients through the funding of transformative science.

While raising funds to support lung cancer research, LCFA will raise the public's awareness and serve as a resource for patients or anyone seeking answers, hope, and access to updated treatment information, scientific investigation, and clinical trials.

You can also join the conversation with LCFA on [Facebook](#), [Twitter](#), and [Instagram](#).
