Title: Is it safe to participate in clinical trials during COVID-19?

Date: 10-20-20

Brief description: Are clinical trials safe to participate in during COVID-19? Clinical trial enrollment across the board is down and much of the issue is the fear patients have about going to a hospital, especially as lung cancer patients in an immunocompromised state. Today we talk to KRAS patient and founder of the KRAS Kickers biomarker group Terri Conneran and a KRAS researcher who is currently enrolling patients in a new KRAS clinical trial. We will give you tips on how you can keep yourself as safe as possible and still get the treatment you need.

A Block Guest: Terri Conneran

LCFA's mission is the improvement in survivorship of lung cancer patients through the funding of transformative science.

While raising funds to support lung cancer research, LCFA will raise the public's awareness and serve as a resource for patients or anyone seeking answers, hope, and access to updated treatment information, scientific investigation, and clinical trials.

You can also join the conversation with LCFA on [Facebook](#), [Twitter](#), and [Instagram](#).
